Product Description

The MicroLogix 1100 controller is designed to broaden application coverage through embedded analog inputs, Ethernet communication, and visualization capabilities. MicroLogix 1100 controllers maintain the same critical features you have come to expect from the MicroLogix family, and expand that capability to include true online editing. MicroLogix 1100 controllers complement our low-end controllers for applications that require up to 144 digital I/O. Each MicroLogix 1100 controller contains 2 embedded analog inputs, with 10 digital inputs and 6 digital outputs. The controller can also expand its I/O capabilities by using the same modules as the MicroLogix 1200 controller. Up to four of the 1762 I/O modules can be used with a single MicroLogix 1100 controller.Using the latest version of our world-class RSLogix 500 programming software, the MicroLogix 1100 controller can be programmed with an instruction set that is common with the MicroLogix and SLC 500 families of controllers. RSLogix 500 Starter, Standard, and Professional applications all support the MicroLogix 1100 controller, including its online editing capabilities.

Application

1.Power industry, the elevator industry, parking, automobile, auto ancillary.
2.feed industry, aluminum smelting machines, refrigeration industry.
3.steel industry, combustion control systems, non-ferrous metal smelting.
4.glass industry, construction machinery, textile machinery, water treatment

Mainly Products

PLC module	Redundancy Module
DCS module	Analog input module
CPU module	Analog output module
IO module	Digital input module
DO module	Digital output module
AI module	Relay Output Module
DI module	Relay Input Module
Power Module	Motion control module
Ethernet module	Network communication module

Best Services Assurance

1.High quality
2.Fast Delivery
3.We provide a large number of brand new in stock.
5.There are many products in stock.
6. We only provide the original new items, 100% make sure the best quality!
